

Notice of Phase 2A Expansion for STP2 funded by IEPA Clean Water State Revolving Fund (SRF)

The Phase 2A expansion of Sewer Treatment Plant #2 located at 955 Ernest St., Washington, IL 61571, was financed by the Clean Water State Revolving Fund (SRF). The SRF program is administered by the Illinois Environmental Protection Agency and receives a portion of its money to fund these types of projects from the U.S. Environmental Protection Agency. This project includes construction of a second oxidation ditch and an additional clarifier. Once complete, it will improve water quality for area residents and businesses both in the City of Washington and within the larger Farm Creek watershed by providing increased treatment capacity and regulatory compliance. SRF programs operate in each state to provide communities the resources necessary to build, maintain, and improve the infrastructure that protects one of our most valuable resources: water.
