

IMPORTANT INFORMATION REGARDING THE EMERALD ASH BORER (EAB)

- EAB was detected in Peoria and Tazewell counties in 2014.
- Once a county is added to the quarantine list additional sightings don't need to be reported. IL Dept of Ag would be flooded with these calls. The important find is the first one - after that assume all ash trees within that county need some type of attention.

You may go to the following Website at

<http://web.extension.illinois.edu/hmrs/eab/> which includes the following information:

1. [Ash Tree Identification & EAB Symptom Checklist](#)
2. [Ash Tree Identification YouTube Video](#) Not sure if you have an ash tree? Let this short video learn about identifying characteristics.
3. [EAB website IL Department of Agriculture](#) Click on Treatment, right hand column for Insecticidal Management for your Ash Tree
