Gentlemen:

We have obtained a quote for the security doors at the Washington Fire Department..
The quote is \$17,500.00. The cost is a based on the location of the doors in relation to power supply....Current locks all have to be replacedDoor frames will have to be replaced.

I am recommending that we move forward with this project.

Subject: Fire Station Key Card Access
Attachments: K-Com Fire Station Proposal.pdf; S&S Fire Station Proposal.pdf

Good morning Chief;

I have attached the quotes from K-Com and S&S Hardware for the installation of Key Card Access Readers at the Fire Station. K-Com's Proposal is \$11,808.00, and S&S Hardware's is \$5,778.92 for a total of \$17,586.82.

This total is considerably more than it was for City Hall. I believe that is due to the following factors present at the Fire Station:

Physical location of the doors in relation to the power unit.
Type of Locks presently on the outer doors that will be replaced.
Door Frames will have to be replaced on doors at the Fire Station

Respectfully,

Kent Henderson
