

# Memo

---

TO: Mayor Manier and City Council  
FROM: Kevin Schone, Public Works Manager  
DATE: June 17, 2019  
SUBJECT: Contract Award-Sludge Disposal

---

The current wastewater treatment budget allows for a planned expenditure of \$30,000 for sludge hauling during fiscal year 19/20. As such, treatment plant personnel reached out to PDC and Waste Management for quotes to haul sludge to their respective landfills. PDC provided a quote for landfilling of sludge at \$32.00/Ton. This quote reflects a 20% reduction from last year's pricing. Waste Management did not provide a quote.

The wastewater treatment facilities generate approximately 170 dry tons of sludge per year, however the moisture content in this sludge can increase this amount to 350-500 tons. The addition of the tandem truck and the ability to haul right from the drying bed to the landfill could reduce moisture content and landfill cost in future years.

Based on the information provided here it would be staff's recommendation for approval to PDC for landfilling of the City's wastewater treatment sludge at an NTE cost of \$30,000.00

This matter has been placed on the City Council consent agenda of Monday, June 17, 2019 for review and approval.
