FAX (309) 444-7511

The City of Washington Police Department worked in FY 18-19 with Oberlander Alarm and Salient Security to install Phase I of the video security system. This system replaced the outdated video software and server to initially get the new security system in place and running. This council memo is intended for the purpose of completing Phase II, the final phase at the Police Department.

Summary

Phase II of the security system upgrade involves the installation of a second storage server, which will allow us the following capabilities:

- Increase storage from 30 days to 60 days.
- Decrease the load on the initial server by splitting cameras between the two servers.
- Provide back up and redundancy should one server go down.
- Increase the frame rate of "critical" cameras to provide better quality images
- The ability to add additional cameras if necessary.

The cost estimate for Phase II for the server and installation is \$6800.00. This is a budgeted expense

Requested Action

Approval of the Phase II project for the video security system at the Police Department.
