

CITY OF WASHINGTON, ILLINOIS
City Council Agenda Communication

Meeting Date: 07-06-2020

Prepared By: Dennis Carr – City Engineer

Agenda Item: Lawndale Construction Staking

Explanation: Mohr & Kerr was the consultant who put together the Lawndale plans and specifications. Construction staking can either be included in the project or can be separated from the contract to allow the city to choose who does the staking. In this case, the staking was not included in the plans and Mohr & Kerr was designated to do the staking. It is not uncommon that the design engineer also does the staking as they already have the design files necessary to do the work.

Mohr & Kerr have been doing the staking for this job up until this date and this proposal is just formalizing the work that they are doing and will allow us to pay them for it.

Fiscal Impact: The proposal shall not exceed \$25,834 and shall be split between the following accounts:

501-00-800-3100

500-00-800-3100

430-01-800-3100

430-02-800-3100

Recommendation/

Committee Discussion Summary: Staff recommends approval of the proposal by Mohr and Kerr to do the construction staking for an amount to not exceed \$25,834.

Action Requested: Approval of the proposal with Mohr and Kerr to perform the construction staking for the City on the Lawndale Public Project.
