

CITY OF WASHINGTON, ILLINOIS
Public Works Committee Agenda Communication

Meeting Date: 09-08-2020

Prepared By: Brian Rittenhouse-Utilities Superintendent
Kevin Schone-Public-Works Director

Agenda Item: Emergency Sanitary Sewer Lining (CIPP) Hilldale Ave.

Explanation: During televising ahead of, and in support of the potential reconstruction of Hilldale Avenue, staff discovered a collapsed sanitary sewer pipe under a resident's home. City crews were checking all the sanitary sewers that crossed under the railroad and through a wooded area when this collapse was found.

Because of the urgency to get this sanitary pipe repaired, Hoerr Construction was contacted to make emergency repairs, the cost of these repairs is 23,855.00. The city could have only lined the collapsed area however there was a price break for doing more footage and because the sanitary pipe crossed under the railroad and through an area hard to access the decision was made to line these sections of pipe as well to lessen the risk of problems moving forward.

Council will remember that Hoerr Construction was the low bid through the commodities bidding for CIPP in April of this year.

Fiscal Impact: \$23,855.00 of the \$150,000.00 budgeted for CIPP. Including these repairs, approximately \$55,000 of the \$150,000 in Acct # 501-00-800-3000 has been used.

Recommendation

Committee Discussion Summary: Staff anticipates these types of repairs and budgets in the event this work is needed. As such, staff recommends payment to Hoerr Construction in the amount of \$23,855.00.

Action Requested: Approval of the requested amount.
