

CITY OF WASHINGTON, ILLINOISCommittee of the Whole Agenda Communication

Meeting Date: 9-11-2023

Prepared By: Dennis Carr – City Engineer

Agenda Item: Candlewood Bridge – Repair Engineering

Explanation: Staff requested resumes and work experience from local Civil Engineering firms. We received a handful of packets, but CMT had the strongest proposal due to their work on another historical masonry arch bridge.

Staff has been working with CMT to build a scope and hours estimate to get a set of repair documents together for the Candlewood Bridge. The bridge repair documents will require IDOT review which always increases the cost of projects due to the coordination needed as well as the multiple submittals required.

The Candlewood Bridge is closed to traffic until IDOT approves of a repair. The repair needs to be certified by a Illinois Structural Engineer. If engineering begins now, a repair can likely be done in 2024 with the bridge being reopened in 2024. If the engineering fee needs to be budgeted in 2024, the engineering will shift construction into 2025 with the bridge to reopen in 2025.

Fiscal Impact:

The engineer's estimated fee is proposed to be \$144,840. There is nothing in the budget for this work.

Recommendation: Staff recommends discussion on the future of Candlewood Bridge as well as the timeframe for the engineering and repair.

EXHIBIT A

City of Washington, Illinois Candlewood Drive over Farm Creek Bridge Repair Project

SCOPE OF SERVICES

The **Scope of Services** for the proposed project shall consist of providing Illinois Department of Transportation required Phase 1 Planning and Phase 2 Construction documentation for the repair of the existing Candlewood Drive over Farm Creek masonry arch bridge. A detailed breakdown of professional services to be provided and managed by CMT is as follows:

1. Project Management, Meetings and Coordination:

- Coordination with City of Washington team during site evaluation, Phase 1, and Phase 2 documentation.
- Meeting with City of Washington team to discuss recommendations and review comments.

2. Field Survey and Data Collection:

- Topographic survey of the bridge adjacent roadway.
- Hydraulic survey of Farm Creek upstream and downstream of Candlewood Dr.
- Collect existing roadway and structure plan information.
- In-depth bridge inspection.
- Geotechnical borings and structure foundation recommendations by sub consultant.

3. Phase 1 – Bridge Condition Report

- Report detailing the field evaluation and existing structural deficiencies.
- Summary of proposed repair scope of work recommendation and associated estimate of costs.
- Submission to IDOT for approval.

4. Phase 1 – Preliminary Bridge Design and Hydraulic Report

- Creating HEC-RAS models of Farm Creek through Candlewood Dr. bridge.
- Preparing IDOT Bureau of Local Roads form 10210 with required exhibits and hydraulic data.
- Preparing required report exhibits.
- Developing the waterway information table.
- Submission to IDOT for approval.

5. Phase 2 – Prefinal Plans, Specifications and Estimates

Produce construction contract documents to contain:

- Structural analysis and design for repairs.
- Roadway drainage mitigation.
- Structural repairs and creek slope stabilization
- Construction specification
- Estimates of probable construction cost and time.
- Submission to City and IDOT for review.

EXHIBIT A

City of Washington, Illinois Candlewood Drive over Farm Creek Bridge Repair Project

SCOPE OF SERVICES

6. Phase 2 – Final Plans, Specifications and Estimates

- Structural load rating submitted to IDOT
- Revise construction documents per City and IDOT comments
- Estimates of probable construction cost and time.
- Submission to City and IDOT.

PROPOSED PROJECT SCHEDULE AND FEE

The total proposed fee for the above-described scope of services is \$145,000.

CMT's services will be performed on a time and materials basis as outlined in the scope above, not to exceed the proposed amount shown with authorization from the City of Washington.
